

Keidai Iiyama

PHD CANDIDATE · STANFORD AERONAUTICS AND ASTRONAUTICS

✉ kiiyama@stanford.edu | 🏠 <https://kdricem.github.io/> | 💼 <https://www.linkedin.com/in/keidai-iiyama/>

Education

Stanford University

Stanford, California

PHD CANDIDATE - AERONAUTICS AND ASTRONAUTICS

2021.9 - present

- Research Area: Lunar Positioning, Navigation, and Timing (Advisor: Grace Gao)

The University of Tokyo

Tokyo, Japan

ME - AERONAUTICS AND ASTRONAUTICS

2019.4 - 2021.3

- Thesis: System Design and Autonomous Orbit Determination Strategy for Lunar Navigation Satellite System (Advisor: Ryu Funase)

The University of Tokyo

Tokyo, Japan

BE - AERONAUTICS AND ASTRONAUTICS

2015.4 - 2019.3

- Thesis: Navigation Satellite Constellation and Monitoring Station Arrangement for Lunar Global Navigation Satellite System (Advisor: Ryu Funase)

Awards, Fellowships, & Grants

AWARDS

2025.9	ION GNSS+ 2025 Best Presentation of the Session (as first-author), for the paper (C23)
2025.5	Lunar Autonomy Challenge Top Prize, out of 31 teams
2024.9	ION GNSS+ 2024 Best Presentation of the Session (as first-author), for the paper (C18)
2023.9	ION GNSS+ 2023 Best Presentation of the Session (as second-author), for the paper (C13)

FELLOWSHIPS & GRANTS

2022.1	Student Registration Grant, 2022 ION ITM Conference
2021.9 - 2022.8	Ph.D. Student Fellowship, Stanford Aero/Astro Department
2021.9 - 2026.6	The Nakajima Foundation Doctoral Studying Abroad Fellowship, Nakajima Foundation
2019.9 - 2021.8	WINGS CFS Fellowship, WINGS CFS, The University of Tokyo

Research Experience

Navigation and Autonomous Vehicles (NAV) Lab, Stanford University

Stanford, CA

ADVISOR: PROF. GRACE GAO

Sep, 2021 - Present

- Designed distributed time transfer algorithm from terrestrial GPS to lunar surface communication networks (C9)
- Designed Positioning and timing algorithm of lunar satellites and rovers using terrestrial GPS time-differenced carrier phase (TDCP) measurements (J2), (C11), (C12), (C14)
- Developed open-source simulator for lunar positioning, navigation, and timing (C15), (C20)
- Proposed satellite ephemeris optimization algorithms for lunar orbits (C13), (J3), (J7)
- Created distributed orbit determination and timing framework for satellite networks using covariance intersection (C17)
- Designed autonomous fault detection algorithm for satellite constellation using inter-satellite links and rigid graphs (C18), (J4)
- Analyzed trade-off space for Lunar GPS constellation design (C22), (J5)
- Proposed staged development algorithm for lunar navigation satellite constellations (C22)
- Analyzed plasmaspheric delays on GNSS signals received at lunar orbit and surface (C23), (J6)

Jet Propulsion Laboratory (332H), California Institute of Technology

Pasadena, CA

ADVISOR: DR. KAR-MING CHEUNG, DR. WILLIAM W. JUN

Jul, 2024 - Sep, 2024

- Designed Mars constellation for communication and PNT
- Proposed orbit determination and time synchronization algorithm that combines inter-satellite link and surface station link
- Related Publications: (C19)

Space Rendezvous Lab, Stanford University

ADVISOR: PROF. SIMONE D'AMICO

Stanford, CA
Sep, 2021 - May, 2022

- Created angles-only navigation algorithm for spacecraft swarms in lunar orbits
- Related Publications: (C8)

Space Systems Optimization Group, Georgia Institute of Technology (Research Collaboration)

COLLABORATOR: PROF. KOKI HO

2020

- Designed guidance, navigation, and control algorithm that combines autoencoder, deep reinforcement learning, and feedback controller that autonomously selects a safe landing target site and plans a divert maneuver from Lidar DEM observations during powered descent to planetary bodies.
- Related Publications: (C5), (C6)

Intelligent Space Systems Laboratory, The University of Tokyo

Bunkyo-Ku, Tokyo, Japan

ADVISOR: PROF. RYU FUNASE

Apr, 2018 - Aug, 2021

- Designed decentralized autonomous orbit determination and clock offset estimation algorithm for lunar navigation satellites connected by crosslinks using a Schmidt-Kalman filter.
- Developed a user positioning simulator for a lunar navigation satellite system. Conducted positioning performance analysis for several constellations and lunar monitoring station arrangement patterns.
- Related Publications: (C3), (C7), (C10)

EQUULEUS Project Team

ADVISOR: PROF. RYU FUNASE

Oct, 2017 - Aug, 2021

- EQUULEUS is a 6U Cubesat lunar mission jointly proposed by JAXA and the University of Tokyo. It was selected as the secondary payload of the EM-1 Mission and achieved a successful lunar flyby.
- Designed and implemented flight software to control heaters and detect faults of the thermal sub-system.
- Related Publications: (J1), (C1), (C2), (C4)

Publications

JOURNAL PAPERS UNDER REVIEW

Teaching Experience

Fall 2024, 2025	AA272: Global Positioning Systems , taught by Prof. Grace Gao, Graduate Course Assistant, Stanford University
Fall 2019	Orbital Mechanics , taught by Prof. Ryu Funase, Graduate Teaching Assistant, The University of Tokyo

Mentoring

2025.9 -	Matthias Kura , Ph.D. Student, Stanford University
2025.9 -	Vivian Sattler , Ph.D. Student, Stanford University
2025.1 - 2025.3	Pauline de la Hougue Moran , M.S. Student, Stanford University
2024.9 -	Kaila Coimbra , Ph.D. Student, Stanford University
2023.1 -	Guillem Casadesus Vila , Ph.D. Candidate, Stanford University
2023.1 - 2024.9	Marta Cortinavis , Ph.D. Candidate, Stanford University
2022.9 - 2023.3	Guillem Rueda Oller , Ph.D. Student, Stanford University
